Unit ____ Extra Credit: Study Plan & Follow-up

Name _____ **Date** _____

This extra credit opportunity is worth up to 5 points.

Three points are for making a study plan for the Unit. Fill in the first chart. It must cover the entire time period for the unit based on the course calendar. The plan **MUST** include at least 5 separate study times. Make it realistic based on your schedule and when you have time to study. **The plan must include a fair amount of detail about how you will accomplish (a) reading the chapters, (b) working problems in the book and/or problem sets, (c) preparing the exam note page (if you are going to use one) and (d) studying for the exam.** It's ok to include other items. It is due at the beginning of the second class in the unit. Detail is important. A quickly dashed off plan with little detail will get no credit! If you don't include 5 study times and address the points a, b, c and d, you won't get credit.

The other two points will be your analysis of how well you did in following the study plan. You must have turned in a study plan that received credit to be eligible to turn in the second part. Fill in the second chart (keep the study plan attached). It must be turned in at the beginning of the class after the unit exam.

The Study Plan for Unit ____ (up to 3 points)

Date/Time	What you will be studying during that study time

How Well Did You Do With The Study Plan? (Up to 2 points)
